Key Findings

- I. Female customers generate slightly higher total revenue than male customers.
- II. Discount users who spend above average are high-value shoppers.
- III. Blouses, dresses and shirts receive the highest ratings.
- IV. Express shipping customers spend 12% more per transaction.
- V. Subscribers spend 45% more and account for 78% of revenue.

Strategic Recommendations

- I. Boost Subscriptions** : Promote exclusive benefits for subscribers.
- II. Loyalty Programs** : Reward repeat buyers to increase retention.
- III. Review Discount Policy** : Balance sales boosts with margin control.
- IV. Product Positioning** : Highlight top-rated and best-selling products in campaigns.
- V. Targeted Marketing** : Focus on high-revenue age groups and express - shipping users.

Key Takeaway

By leveraging customer data, the company can personalize marketing, optimize product offerings, and enhance the shopping experience driving higher sales, stronger engagement, and long-term loyalty.

Insights

Female customers generate slightly higher total revenue than male customers.
Gender-based marketing strategies could optimize revenue streams.

Sam

Express shipping customers spend 12% more per transaction.
